The goal of MWAA is to facilitate interactions between mathematicians from the midwestern United States working in approximation theory, mathematical physics, potential theory, complex analysis, and related fields by bringing them together in an informal way for a two day workshop (preceded by a Friday Colloquium). A major objective is to expose attending graduate students to different areas of analysis. Participants are encouraged to present a poster.

Speakers
Johann Brauchart (Technische Universität Graz, Austria)
Duncan Dauvergne (University of Toronto)
Manuela Girotti (Colorado State University)
Bartosz Langowski (Indiana University)
Jirí Lebl (Oklahoma State University)
Alan Legg (Purdue University Fort Wayne)
Karl Liechty (DePaul University)
Myrto Manolaki (University of South Florida)
Ken McLaughlin (Colorado State University)
Tetiana Stepaniuk (Technische Universität Graz, Austria)
Krystal Taylor (Ohio State University)
