The goal of MWAA is to facilitate interactions between mathematicians from the midwestern United States working in approximation theory, mathematical physics, potential theory, complex analysis, and related fields by bringing them together in an informal way for a two day workshop (preceded by a Friday Colloquium). A major objective is to expose attending graduate students to different areas of analysis. The conference is partially funded by the National Science Foundation and we should be able to cover travel and lodging expenses. *Participants are encouraged to present a poster.*

**Speakers**

Jeff Anderson (Purdue University Fort Wayne)
Jinho Baik (University of Michigan)
Steven Bell (Purdue University)
Sergiy Borodachov (Towson University)
Marc Carnovale (Ohio State University)
Juan Criado del Rey (KU Leuven, Belgium)
Shaoyu Dai (Jinling Institute of Technology, China)
Alyssa Genschaw (University of Connecticut)
Steven Hussung (IU Bloomington)
Dominique Kemp (IU Bloomington)
Maya Stoyanova (Sofia University, Bulgaria)
